

Lindsay Gross

lindsaygross32@gmail.com | (973) 634-3182 | [LinkedIn](#) | [Website](#) | [GitHub](#)

Safety-focused AI practitioner with hands-on experience designing evaluation frameworks, building new enforcement processes end-to-end, and coordinating across engineering, policy, and product teams to drive trust and safety outcomes.

WORK EXPERIENCE

Research Fellow, Deep Tech at Duke, Durham, NC

Feb 2025 – Present

- Building a detection evaluation system to classify AI-generated content on Spotify, defining scoring rubrics and cross-referencing heuristics; validating outputs against manual human review to benchmark accuracy, surface regressions, and inform platform enforcement decisions.
- Led a governance case study for Paladin's "AI Tech Stack" initiative, evaluating security risks, rogue-agent failure modes, and accountability gaps in production AI systems; findings adopted into Paladin's published risk framework.

Trust & Safety Analyst, Tremau, Remote

May 2024 – Sept 2024

- Conducted safety evaluations for a major social media platform under the EU Digital Services Act, identifying 15+ policy gaps across online safety, AI accountability, and content moderation; built remediation roadmaps adopted by leadership.
- Built enforcement review processes and escalation workflows from scratch with the client's Trust & Safety Council, translating regulatory requirements into operational runbooks and SOPs now used across the client's moderation team.

AI Ethics, Policy and Research Fellow, Metaphysic.ai, Remote

Feb 2024 – July 2024

- Co-developed a safety review and evaluation framework for hyper-realistic generative AI where no internal precedent existed, defining review criteria, escalation workflows, and compliance documentation; onboarded 8 clients in 3 months with 100% adherence.
- Authored a 20+ page policy paper analyzing US copyright law implications for AI training data, translating legal findings into policy recommendations that shaped the company's data sourcing practices.

Cybersecurity Research Assistant, Sanford School of Public Policy, Durham, NC

Dec 2023 – May 2024

- Produced a cybersecurity best practices report on cloud solutions and the NIST framework, coordinating across policy faculty and industry stakeholders; referenced by Politico, Forbes, and the World Economic Forum.

SELECTED PROJECTS

Impunity Index: NLP Evaluation Pipeline | [Website](#) | [GitHub](#)

- Built an evaluation pipeline scoring accountability gaps across 1.4M documents and 1,264 individuals, interpreting results to surface a 77–98% no-consequence rate. Stack: spaCy, VADER, Sentence Transformers, LinearSVC, D3.js, Flask, GCP.

SAFE-T: AI Equity Audit | [Website](#)

- Developed an equity evaluation framework across 65 Durham census tracts, uncovering ~25% undercounting in low-income areas and a 29.5% disparate impact ratio; presented findings and mitigation recommendations to Durham Transportation Dept. Stack: Python, GeoPandas, Vite, Leaflet.js.

AI Audit: EU AI Act Compliance Tool | [GitHub](#)

- Created a risk classification evaluation tool (FastAPI, Streamlit, GCP Cloud Run) assessing AI system risk levels under the EU AI Act using TF-IDF + logistic regression, enabling non-technical users to generate prioritized remediation plans.

EDUCATION

MEng, Artificial Intelligence, Duke University, Durham, NC

May 2025 – May 2026

Coursework: Deep Learning, Reinforcement Learning, Intelligent Agents, AI Product Management, Explainable AI

BA, Public Policy | Digital Intelligence Certificate, Duke University, Durham, NC

Aug 2021 – May 2025

GPA: 3.94 | Cum Laude | Dean's List | VP & Co-founder, Duke Tech for Change | TSPA Member | All Tech Is Human Board

SKILLS

Technical: Python, SQL, PostgreSQL, JavaScript, TypeScript, Node.js, React, Flask, FastAPI, Streamlit, Anthropic API, HuggingFace, scikit-learn, spaCy, Pandas, NumPy, BeautifulSoup, D3.js, Docker, Git, GCP, AWS

Safety & Governance: Trust & Safety Operations, Risk Assessment, Policy Enforcement, Evaluation Frameworks, Compliance Auditing, Program Management, Cross-functional Coordination, Process Design, SOPs & Runbooks, Stakeholder Documentation, AI-Assisted Workflows

Languages: English (Native), Spanish (Professional Proficiency)
